

PROFILE SUMMARY

“To build cutting-edge web and game applications that merge innovation, performance, and user-centric design.”

Dedicated Full Stack Developer with 4+ years of experience crafting responsive, scalable web applications and interactive gaming experiences. Proficient in frontend and backend technologies including React, Redux, Express, Node.js, and MongoDB, with strong expertise in UI/UX optimisation, API integration, and performance tuning. Adept at Agile development and collaborating with cross-functional teams. Hands-on experience in Unity and 3D programming. Developed and launched innovative digital products while implementing enhanced development practices to create seamless user experiences.

AREAS OF EXPERTISE

- Full-Stack Web Development
 - Web UI/UX Optimisation
 - System Design & Microservices Architecture
- API Design & Integration
 - Applied Generative AI Integration
 - Database Management
- Game Mechanics Design
 - Debugging & Performance Tuning
 - Agile Development & Cross-functional Collaboration

WORK HISTORY

Forgan’s | United Kingdom

Aug 2024 – Sep 2025

Frontend Development Intern

- Designed user-centric dashboards, wireframes, and project architecture for structured workflows.
- Developed responsive and user-friendly UI components using React.js, JavaScript, HTML5, and CSS3.
- Focused on performance optimization, usability, and accessibility standards.
- Created Detailed Project Reports (DPR) documenting design decisions, processes, and implementation.
- Integrated RESTful APIs and ensured smooth data flow between frontend and backend.

WIPRO | India

Jul 2019 – Jul 2022

Project Engineer

- Orchestrated development of dynamic web apps with React, enhancing user engagement by 25%.
- Engineered reusable React components and introduced Redux for scalable state handling.
- Integrated RESTful and SOAP APIs to streamline external service communication.
- Diagnosed and optimized React application performance, slashing load time by 20%.
- Streamlined backend processes with Node.js and refined database queries for efficiency.
- Administered Linux-based application support, decreasing incident response by 30%
- Coordinated version control with Git and contributed to Agile-driven project delivery.

EDUCATION

- Master of Science in Game Development from Abertay University, Dundee, UK
 - Bachelor of Technology in CSE from Chandigarh Group of Colleges, Mohali, India
- Sep 2022 – Sep 2023

Jul 2015 – May 2019

TECHNICAL SKILLS

Frontend Technologies	React, Redux, HTML5, CSS3, JavaScript (ES6+), Three.js, Express
Backend & APIs	Node.js, Express.js, RESTful APIs, SOAP, JWT, OAuth2
Artificial Intelligence	Gen AI
Languages	C++, C#, Java, SQL
Databases	MongoDB, PostgreSQL, NoSQL
Development Tools/Practices	Git, GitHub, Chrome DevTools, Agile methodologies
Architecture & System Design	Microservices Architecture, RESTful Design, Authentication & Authorization
3D/Game Development	Unity 3D, Blender 3D, Three.js, DirectX3D
Operating Systems	Linux

PROJECT EXPOSURE

- [Current] Building an **Artist Portfolio Platform** using **MERN Stack** – with integration of **Gen AI** .
- **Built** a dynamic **Weather App** using React and Three.js by integrating real-time API data, delivering an interactive user interface.
- **Co-developed** a **2D game** in Unity as part of a 4-member team, contributing to gameplay mechanics, level design, and user engagement strategies.
- **Participated** in multiple **itch.io Game Jams**, enhancing skills in rapid prototyping, creative problem-solving, and collaborative development under tight deadlines.
- **Designed and implemented** “**Time Traveller**,” a puzzle-based grid board game using React and Three.js, where players solve challenges and collect artefacts to escape time.

TRAINING & CERTIFICATES

Ducat | India

Nov 2025 -Current

Gen AI

- Currently training in Generative AI with focus on real-world implementation.
- Building AI-powered web applications using LLM APIs.
- Exploring RAG pipelines, vector search, and prompt engineering.
- Applying Gen AI to improve automation and user interaction systems.

Bharat Electronics Limited | India

2015 - 2015

Web Development Intern

- Crafted and maintained UI components using HTML, CSS, and JavaScript.
- Enhanced responsiveness and accessibility across devices and platforms.
